

EssentialsX

What It Is

With over 130 commands, EssentialsX provides one of the most comprehensive feature sets out there, providing teleportation, moderation tools, gameplay enhancements and more.

Just want the homes and warps? Great. Need a sign shop? Done. Want complex and rich kits with enchantments, custom books and lore? Sorted.

Whether you're a small group of friends or a huge server with hundreds of players, we've got the basics covered.

Useful Commands

Way too many to list here! Check the wiki link above.

If you need something set in the EssentialsX config.yml, let your friendly family server admin know!

Related Plugins

EssentialsX - Chat

EssentialsX Chat includes many of EssentialsX's chat features. It allows you to customise chat formatting on your server by adding prefixes, suffixes and colours in chat, as well as setting different formats for different groups.

You need Vault and LuckPerms to give players prefixes and suffixes and to detect groups.

EssentialsX - Discord

EssentialsX Discord brings a simple, lightweight, easy-to-use, and bloat-free bridge between Discord and Minecraft.

EssentialsX Discord offers essential features you'd want from a Discord bridge such as:

- MC Chat -> Discord Channel
- Discord Channel -> MC Chat
- Basic MC -> Discord Event Monitoring (Join/Leave/Death/Mute)
- MC Console -> Discord Relay
- Discord Slash Commands
 - /execute - Execute console commands from Discord
 - /msg - Message Minecraft players from Discord
 - /list - List players currently online on Minecraft

For more information on how to set up EssentialsX Discord, check out the EssentialsX Discord tutorial!

EssentialsX - Spawn

EssentialsX Spawn lets you control where players spawn both when they first join the server and when they die. You can use the in-game /setspawn command to set a spawn location for everyone on your server as well as for specific groups.
